

Requirement ID 31.1: Sprint 3 Requirements Stack

Ticket Details

Description: As a team, finalize requirements for Sprint 3. Provide a brief description of each requirement, estimate each story using planning poker, and prioritize each one.

AC: The acceptance criteria is to create a spreadsheet with the above information.

Ticket Logistics

Assignee: Sophia Jacob, Anna Lin, Kusuma Murthy, Nimra Syed, Nikka Vuong

Estimated Points: 3 points

Actual Points: 3 points

Branch: N/A

Extra Notes: This is Requirement 31.1.

Requirement ID 31.2: Sprint 3 Requirements Artifacts

Ticket Details

Description: As a team, finalize requirements artifacts for Sprint 3. Provide a brief description of each requirement, estimate each story using planning poker, and prioritize each one.

AC: The acceptance criteria is to create a document containing all Sprint 3 tickets.

Ticket Logistics

Assignee: Sophia Jacob, Anna Lin, Kusuma Murthy, Nimra Syed, Nikka Vuong

Estimated Points: 3 points

Actual Points: 3 points

Branch: N/A

Extra Notes: This is Requirement 31.2.

Requirement ID 32: Implement Sorting In The Favorites Page

Ticket Details

Description: Users should have an option to sort their liked cities based on if they like to see their cities from oldest to newest or in Alphabetical order.

AC: Users should be able to sort their cities and view based on their preference.

Ticket Logistics

Assignee: Nimra Syed

Estimated Points: 3 points

Actual Points: 3 points

Branch: N/A

Extra Notes: This is Requirement 32.

Requirement ID 33: Add Tutorial for How App Works

Ticket Details

Description: Implement a tutorial feature for new users when they first create an account to explain how the app works.

AC: Tutorial should be intuitive for the user so that they can understand app functionalities with a user-friendly interface.

Ticket Logistics

Assignee: Sophia Jacob

Estimated Points: 8 points

Actual Points: 8 points

Branch: N/A

Extra Notes: This is Requirement 33.

Requirement ID 34: Create Feature for Users to Add Friends

Ticket Details

Description: Implement feature to allow users to add friends by clicking on an “person” icon within each post on the Home page. This requires storing the list of friends users have added in Firebase.

AC: Ensure that users are able to add each other and sync with Firebase.

Ticket Logistics

Assignee: Kusuma Murthy

Estimated Points: 5 points

Actual Points: 5 points

Branch: N/A

Extra Notes: This is Requirement 34.

Requirement ID 35.1: Create a Script to Pre-Fetch All City Images

Ticket Details

Description: Generate a script to pre-fetch all the city images. This way the Recommendation Page will not need to fetch images as users swipe through cities. This will reduce lag time for the frontend. Images will be stored in AWS.

AC: Ensure images will be pre-fetched and stored to AWS.

Ticket Logistics

Assignee: Nimra Syed, Nikka Vuong

Estimated Points: 3 points

Actual Points: 3 points

Branch: N/A

Extra Notes: This is Requirement 35.1.

Requirement ID 35.2: Create a Script to Pre-Fetch All City Descriptions

Ticket Details

Description: Generate a script to pre-fetch all the city descriptions and store them in Firebase. This way the Recommendations(and eventually the Favorites page) will have proper and consistent descriptions of the cities.

AC: Ensure that the descriptions are pre-fetched and stored to Firebase.

Ticket Logistics

Assignee: Nimra Syed, Nikka Vuong

Estimated Points: 3 points

Actual Points: 3 points

Branch: N/A

Extra Notes: This is Requirement 35.2.

Requirement ID 36.1: Improve User Questions to Create User Vector

Ticket Details

Description: Update the UI of the profile setup and make the questions to better capture the user's preferences.

AC: The questions are updated.

Ticket Logistics

Assignee: Nikka Vuong

Estimated Points: 3 points

Actual Points: 3 points

Branch: N/A

Extra Notes: This is Requirement 36.1.

Requirement ID 36.2: Improve the Model with the New Questions

Ticket Details

Description: Re-integrate the new questions into the model by re-training it to learn better recommendations based on the user preferences.

AC: This will output better cities and will get recommended to the user.

Ticket Logistics

Assignee: Sophia Jacob

Estimated Points: 8 points

Actual Points: 8 points

Branch: N/A

Extra Notes: This is Requirement 36.2.

Requirement ID 37: Improve Rating Algorithm for First Posts

Ticket Details

Description: Improve the rating algorithm when users create their first post. Currently, the initial rating is statically computed based on the initial user feedback (LIKE, DISLIKE, NEUTRAL). The new algorithm should dynamically rate the post based on the initial user feedback as well as cities' Global ELOs.

AC: Ensure ratings for initial user posts are dynamically computed.

Ticket Logistics

Assignee: Anna Lin

Estimated Points: 3 points

Actual Points: 3 points

Branch: N/A

Extra Notes: This is Requirement 37.

Requirement ID 38: Refactor Favorites Component

Ticket Details

Description: Refactor files for the component (.tsx and .styles) to maintain consistency and get rid of unnecessary logic and duplicate details.

AC: Code should be consistent and there should be no duplicates.

Ticket Logistics

Assignee: Nikka Vuong

Estimated Points: 5 points

Actual Points: 5 points

Branch: N/A

Extra Notes: This is Requirement 38.

Requirement ID 39: Refactor Itinerary Component

Ticket Details

Description: Refactor files for the component (.tsx and .styles) to maintain consistency and get rid of unnecessary logic and duplicate details.

AC: Code should be consistent and there should be no duplicates.

Ticket Logistics

Assignee: Nimra Syed

Estimated Points: 5 points

Actual Points: 5 points

Branch: N/A

Extra Notes: This is Requirement 39.

Requirement ID 40: Refactor Recommendations Component

Ticket Details

Description: Refactor files for the component (.tsx and .styles) to maintain consistency and get rid of unnecessary logic and duplicate details.

AC: Code should be consistent and there should be no duplicates.

Ticket Logistics

Assignee: Sophia Jacob

Estimated Points: 5 points

Actual Points: 5 points

Branch: N/A

Extra Notes: This is Requirement 40.

Requirement ID 41: Refactor User Posts Component

Ticket Details

Description: Refactor files for the component (.tsx and .styles) to maintain consistency and get rid of unnecessary logic and duplicate details.

AC: Code should be consistent and there should be no duplicates.

Ticket Logistics

Assignee: Anna Lin

Estimated Points: 5 points

Actual Points: 5 points

Branch: N/A

Extra Notes: This is Requirement 41.

Requirement ID 42: Refactor User Itineraries Component

Ticket Details

Description: Refactor files for the component (.tsx and .styles) to maintain consistency and get rid of unnecessary logic and duplicate details.

AC: Code should be consistent and there should be no duplicates.

Ticket Logistics

Assignee: Kusuma Murthy

Estimated Points: 5 points

Actual Points: 5 points

Branch: N/A

Extra Notes: This is Requirement 42.

Requirement ID 43: Refactor Profile Component

Ticket Details

Description: Refactor files for the component (.tsx and .styles) to maintain consistency and get rid of unnecessary logic and duplicate details.

AC: Code should be consistent and there should be no duplicates.

Ticket Logistics

Assignee: Nikka Vuong

Estimated Points: 5 points

Actual Points: 5 points

Branch: N/A

Extra Notes: This is Requirement 43.

Requirement ID 44: Refactor Home Component

Ticket Details

Description: Refactor files for the component (.tsx and .styles) to maintain consistency and get rid of unnecessary logic and duplicate details.

AC: Code should be consistent and there should be no duplicates.

Ticket Logistics

Assignee: Nikka Vuong

Estimated Points: 5 points

Actual Points: 5 points

Branch: N/A

Extra Notes: This is Requirement 44.

Requirement ID 45: Refactor Create Post Component

Ticket Details

Description: Refactor files for the component (.tsx and .styles) to maintain consistency and get rid of unnecessary logic and duplicate details.

AC: Code should be consistent and there should be no duplicates.

Ticket Logistics

Assignee: Kusuma Murthy

Estimated Points: 5 points

Actual Points: 5 points

Branch: N/A

Extra Notes: This is Requirement 45.

Requirement ID 46: Refactor Backend

Ticket Details

Description: Refactor app.py and other backend files to maintain consistency and get rid of unnecessary logic and duplicate details.

AC: Code should be consistent and there should be no duplicates.

Ticket Logistics

Assignee: Anna Lin

Estimated Points: 5 points

Actual Points: 5 points

Branch: N/A

Extra Notes: This is Requirement 46.
